Intensive Aphasia Program

The UCF Communication Disorders Clinic is pleased to offer the Intensive Aphasia Program (IAP) with Dr. Amy E. Engelhoven, Ph.D., CCC-SLP, Director of the Aphasia House. The IAP is an innovative and intensive 6-week therapy program for stroke survivors. This life-enhancing program is offered five times a year.

What is aphasia?
Aphasia is the loss of language from some type of neurologic injury, whether it is a stroke, tumor, disease or traumatic brain injury. Aphasia can affect the ability to communicate through speaking, listening, reading, writing and gesturing. There are approximately 400,000 strokes a year in the U.S. and 80,000 stroke survivors have aphasia. Approximately one million people, or one out of every 275 adults in the U.S., have some type of aphasia, according to the National Aphasia Association (NAA).

Why is aphasia a chronic condition?
Aphasia is “life-altering”. There is no known cure for aphasia, yet its impact is felt for the rest of a person’s life. Because aphasia disrupts communication, it affects every aspect of daily living. According to the NAA, ninety percent of people with aphasia feel isolated. Seventy percent of people surveyed felt others avoided contact with them, because they could not speak well.

How can the Intensive Aphasia Program help?
The IAP is an intensive 6-week program, Monday through Thursday, for 4 hours per day. The goal of the program is to increase communication skills. In total, participants will receive 96 hours of clinical service, with 4 hours designated for pre- and post-evaluation. Participants receive an individualized therapy program based on their assessment performance. Therapy will consist of individual and group sessions under the direction of the IAP clinical educators and assisted by master-level student clinicians. Therapeutic intervention is based on the latest evidence-based practice and will be complimented by assistive technologies and weekly community re-engagement activities.

Who is the Prospective Participant?
Participants must be adults with aphasia, at any level of impairment, that are medically stable as verified by their family physician. They must also be cognitively and physically able to endure the intensity of the program and must not demonstrate behavioral problems indicative of poor motivation or lack of cooperation. Finally, they must be a minimum of 6 months post onset of their neurologic injury.

The cost of the UCF Intensive Aphasia Program is $7,500.00. This covers individual and group therapy for a total of 96 therapy hours over a period of 6 weeks, along with pre and post-evaluations.

**Payment is expected as follows:**
- $2,500.00 is expected four weeks prior to the start date of the session.
- $2,500.00 on the first day of the first week.
- $2,500.00 on the first day of the fourth week – less possible insurance reimbursement.

**Insurance Reimbursement:**
The Deficit Reduction Act (DRA) of 2005 limited certain numbers of units for outpatient therapy per day for physical therapy, occupational therapy, and speech-language pathology, to control inappropriate billing. This means that UCF may only bill your insurance for one therapy hour per day or a maximum of $1,920.00. The reimbursement from your insurance will depend on your benefit, co-insurance, and deductibles.

Please sign and return this form with your application packet, to acknowledge that you understand the payment schedule. Should you have further questions, please contact: Joanne Bradburn, Office Manager, at 407-882-0472.

AUTHORIZATION TO VIDEO TAPE, AUDIO TAPE, PHOTOGRAPH AND/OR OBSERVE

The University of Central Florida’s Communication Disorders Program, in addition to providing services to the Central Florida community, functions as a training clinic for graduate students in the Communication Disorders Program. The Florida Alliance for Assistive Services and Technology (FAAST) also provides similar training and supervision in conjunction with the University Communication Disorders program. Because of this, you may encounter certain situations in the clinic that you might not be exposed to in another treatment setting.

In order for the student clinician to receive thorough supervision, it may be necessary for the clinician to tape (Audiotape and Videotape) the sessions. In addition, there is a one-way mirror in each therapy room, and an observation room adjoining. From time to time, the student clinician’s session may be observed by the supervisor or by other student clinicians. At times, video and audio tape(s) may be used for educational purposes.

A fully qualified professional supervises each client’s program at the Clinic. Graduate Students may be assigned to work with certain clients. A qualified faculty member, however, will be responsible for the professional services. This professional will supervise, counsel and direct the clinical activities.

In hereby authorize clinical personnel from the [ ] Communication Disorders Clinic and/or [ ] FAAST to video tape, audio tape, photograph, and/or observe clinical sessions for:
