

**Athletic
Training**

UNIVERSITY OF CENTRAL FLORIDA

Master of Athletic Training

A health career with options

What do athletic trainers do?

Athletic trainers are multi-skilled medical professionals educated to diagnose and treat injuries, illnesses, and general medical conditions. They provide emergency, urgent, and general care; rehabilitate patients back to healthy activity; promote health and wellness; and recognize psychological disorders. ATs work in collaboration with physicians, surgeons, therapists, and other medical health providers to deliver complete patient care.

Where do athletic trainers work?

- *Secondary schools
- *Colleges and universities
- *Professional sports
- *Outpatient rehabilitation facilities
- *Physician offices
- *Hospitals and clinics
- *Performing arts
