Social Work License: Preparation Review Course

Proceeds from this program will be used to support the University of Central Florida, School of Social Work.

This two day, comprehensive course covers test-taking strategies and relevant clinical content in order to achieve success on the clinical social work licensure exam.

**Dates:** Saturday, **May 21, 2016** and Sunday, **May 22, 2016**- 8:30AM to 4:30PM

**Location:** UCF Main Campus, HPA 1, Room to be Announced

**Cost:** $195.00 for social work students, $250.00 for members in the community.

* Study materials included. No meals or snacks provided.

**Instructor:** Sophia F. Dziegielewski, Ph.D., LCSW, Professor at the University of Central Florida, School of Social Work will teach the course. Dr. Dziegielewski has over 135 publications, including 8 textbooks and has conducted numerous workshops in the areas of health and mental health. To date, she has trained over 18,000 social workers with this licensure preparation course.

Registration information will be at: [http://iog.ucf.edu/](http://iog.ucf.edu/)

Please contact Dr. Sophia Dziegielewski for more information at: sophia.dziegielewski@ucf.edu

### COURSE OBJECTIVES:

**Test Taking Strategy:**
- Identify how to break down questions and identify key words.
- Apply Bloom’s taxonomy to how questions are formulated.
- Practice how to take social work practice information and address it in a standardized format.

**Specific Content Areas that will be covered relevant to the licensure exam:**
- Identify and interpret psychosocial history and collateral data, and how it relates in the social work practice setting
- Assess client problems along with behavioral/psychosocial strengths and weaknesses
- Identify diagnosis, assessment and practice intervention utilizing the DSM-5
- Define the components of intervention strategies with individuals, groups, families and communities
- Recognize the major theoretical approaches, models and methods of practice in the social work profession
- Identify factors in the therapeutic relationship that facilitate building and retaining relationships
- Summarize major theoretical approaches to understanding human development with individuals, groups, families
- Sketch the theories and stages of normal psychosocial, cognitive, moral and behavioral development in the life cycle of individuals, families and groups
- Recite and synthesize the dynamics of abuse and neglect
- Review and interpret the NASW Code of Ethics
- Translate the most common policies and procedures that govern service delivery
- Restate the roles and functions related to professional supervision and educational expectations
- Tabulate issues relative to practice management
